## CONSENT

Dear parent/caregiver/primary carer/legal guardian

Working with young people presents certain issues and legislation that psychologists must adhere to. The following clarifies where our role as a Psychologist starts and ends. It also outlines our ethical and legal responsibilities with regards to working with young people.

A young person is defined as "someone under the age of 18years old". A client-parent (or parents) is "the person who engages the psychologist to provide a psychological service for a young person".

Whilst we do our best to communicate with the client-parent regarding the progress of the young person in counselling, we cannot disclose any personal information unless we gain a written consent from the client i.e. "the young person", or they are deemed too young to understand these terms, disclosure to the client parent can occur.
